January 24, 2023

```
[4]: name = input('What\'s your name?')
     print('Hi '+ name+'!')
```

```
What's your name?marifer
Hi marifer!
```

1 Here's a header

Here's some text with a word in **bold**

1.1 Here's a sub-header

Here's some italic text.

And here

- is
- a
- bullet
- list

Shortcuts:

- esc to jump to command mode
- m to convert the cell to a markdown cell, and
- enter to jump back to edit mode.
- y to convert back to code

Some useful command mode keyboard shortcuts (in no particular order) are:

- a - insert new cell above
- b - insert new cell about
- c - copy cell
- x - cut cell
- v - paste cell below current cell
- V (shift V) - paste cell above current cell
- d d (double click the d key) - delete cell
